## **Examiners' Methodology**

The Examination is based upon standards and testing approved by the LDI. The Examiners' work plan was developed based upon a targeted examination approach as determined by the LDI and relevant Louisiana insurance laws. The NAIC Market Regulation Handbook (Handbook) served as guidance and the basis for the procedures performed, modified to meet the specific needs of the LDI and consider Louisiana laws. Examination testing procedures were performed following the review of preliminary data requests, interviews with management, and consultation with the LDI.

During the course of the Examination, the Examiners selected and tested samples related to the scope of the Examination. Specifically, the Examination focused on a review of the following practices and procedures:

1. Complaint Handling
2. Claims Handling
  - a. Closed with payment claims
  - b. Closed without payment claims

The Examiners accomplished a review of these areas through the interviews with senior Company managers and officers, who explained the Company's operations, and through the examination of the Company's policies and procedures, and random sample testing of complaints and claim files.

The Report is focused on improper practices by the Company, which resulted in non-compliance with Louisiana laws. Criticisms were prepared and communicated to the Company addressing potential violations identified during the Examination. Violations and areas of non-compliance are cited in this Report as a Finding. All Findings have been approved by the LDI prior to submitting them to the Company for their review and response.

The Examiners recommended a sampling methodology and approach which included random sample selections specific to the scope areas under review. Galvanize was used to select each random sample. Each sampling methodology and approach was approved by the LDI.

### **Complaint Handling**

The Examiners submitted IDRs (Information and Data Requests) during the Examination, for which the Company provided responses. Interviews were conducted with the Company's management and operational personnel knowledgeable of the Company's complaint handling processes and procedures. The Examiners used the information from these sources to determine whether complaint handling procedures were adequate. A random sample was selected from the Company's complaint logs, which were provided for the Examination Period to test for compliance with specific Louisiana laws.

The complaints selected were reviewed to determine whether complaint files were handled in accordance with Louisiana laws and the Company's complaint handling procedures and whether there was sufficient documentation to show the Company addressed all aspects of the complaint. The Examiners also tested the complaint samples to determine whether the Company's responses to the LDI were timely, complete, and accurate. In addition, the Examiners reviewed claims associated with each complaint sample to determine whether the Company's claim disposition was reasonable and whether the disposition was changed as a

result of the complaint. The Examiners' testing of the associated claims included determining when satisfactory proof of loss was submitted to the Company. The Examiners considered satisfactory proof of loss when the Company received sufficient information from the insured and/or inspections were completed indicating a payment was owed.

### **Claims Handling**

The Examiners submitted IDRs throughout the course of the Examination, for which the Company provided responses. Interviews were conducted with the Company's claim management and operational personnel knowledgeable of the Company's claim handling processes, practices, and procedures.

The Examiners selected and tested random samples of claims closed with payment and claims closed without payment during the Examination Period. The claims selected were reviewed to determine whether the claim files were handled in accordance with Louisiana laws, the Company's claim handling procedures and whether there was sufficient documentation to show the Company handled the claim correctly. The Examiners' testing of the sampled claims included determining when satisfactory proof of loss was submitted to the Company. The Examiners considered satisfactory proof of loss when the Company received sufficient information from the insured and/or inspections were completed indicating a payment was owed.

Thereafter, only one additional extension of the period of time for initiating a loss adjustment may be allowed and must be approved by the Senate Committee on Insurance and the House Committee on Insurance, voting separately.
